

# YOU GOT 2 SECONDS?

## CONVERT CLIPLESS TO PEDAL DABS PLATFORMS

- secure and aggressive tread
- easy on/off
- no purchase of extra cleats

Perfect solution for when you do not want to wear your cycle shoes. Easy to use and effective. ~Tony

I have been looking for this exact product! ~Dave

This well made, strong, and durable item will be in use for many years to come...fulfilling the need for when using cycling shoes just don't fill the bill (e.g. sporadic rides with the family around the neighborhood, quick jaunts to the local store, a quick lunch-break at work, etc.) ~latrblshir

Awesome! Easy to use, and to take on and off. Use them all the time! ~Bill

Every clipless pedal owner should have a pair. They work absolutely as advertised. When I need to ride down the block or take a quick spin over to the post office, Pedaldabs work just perfectly. Clip in securely, grip shoes well. ~Dr. Isotope

It means I can go for a full Lycra nerd ride on Saturday and a nice leisure ride on Sunday on the same bike, dressed like a normal person. Marvellous! ~Nick

Videos showing installing and removing the PedalDabs are available at <http://www.bikedabs.com/videos> or by scanning this QR-code on all packaging and displays.

When installing, it helps to keep the front end of the PedalDab seated in the pedal with pressure between your thumb and forefinger while you clamp together on the latch end with the heel of your other hand. When removing, just remember that the pedal latch must be pulled back to release the PedalDabs, they don't release by the usual twisting motion. This can be done with the heel of the hand, the fingers, or a tool for high tension setups.
